CODENAMES BACK TO HOGWARTS

Hogwarts School of Witchcraft and Wizardry welcomes you back for another year. Returning students are responsible for ensuring that our new batch of first-year students learn everything they need to know about Hogwarts: how to find their classes, how to get into the common room at the end of a long school day, and – if it comes to it – how to sneak around the castle without getting caught.

*/ WAYS TO PLAY

* CODENAMES

If you already know how to play Codenames, you should be able to start playing after you set up the game. If you'd like to discover the new ideas we've brought to this version of Codenames, go to page 12.

If this is your first game of Codenames, set up the game as shown on pages 4 and 5, read the rules on pages 6 and 7, and then check out the example on pages 8 and 9.

198 word and picture cards

72 maps (showing prefects which cards belong to which House)

1 stand (for the map card)

9 House tiles in each color (to show when a card has been found)

1 Sorting Hat token (to show who goes first)

6 locked door tiles (to be avoided)

1 Argus Filch tile (to be avoided at all costs)

* SPECIAL ABILITIES

Once everyone knows how to play, you can play games using the Houses' special abilities. Abilities are explained on page 12, with specific rules in the Hogwarts House Compendium.

4 ability cards (1 for each House)

8 herbology cards (for Hufflepuff)

1 double-sided key token (for Gryffindor)

2 double-sided serpent/cunning tokens (for Slytherin)

2 double-sided deduction tokens (for Ravenclaw)

3 double-sided herbology tokens (for Hufflepuff)

* HOUSE CUP COMPETITION

The hourglass stand lets you record the outcomes of your games. Each victory brings a House one step closer to winning the House Cup!

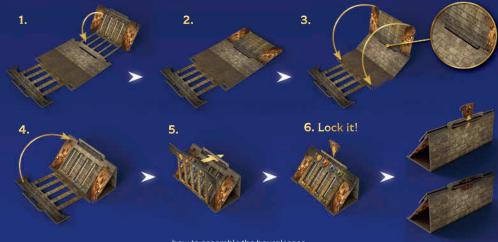

36 hourglass tokens

4 double-sided House banners

1 cardboard stand with hourglasses

how to assemble the hourglasses

SETUP FOR THE FIRST GAME

* WORDS OR PICTURES?

Each card has a word on one side and a picture on the other. The game can be played with either words or pictures. Most players believe that one way is hard and the other way is easy, but they usually can't agree on which is which.

Choose words or pictures and lay out 24 random cards, with the chosen side up. Lay them out in a 5×5 grid, with an empty **space** in the middle.

* HOUSES

Codenames is a game for 4 or more players divided into 2 Houses. You can split into Houses however you like, just try to keep them roughly even in size. For your first game, the team with more glasses-wearing players gets to be Gryffindor, and the other team gets to be Slytherin. Or, you can flip a coin.

* PREFECTS

Each House chooses 1 player to be their prefect. The prefects will give clues, and the other players will be first-years, wandering around Hogwarts Castle, trying to find information that the clues refer to.

Both prefects need to sit on the same side of the table, opposite the rest of their team.

* MAP CARD

The map corresponds to the grid on the table, showing which cards belong to which House. For your first game, you need a map for Gryffindor and Slytherin, one with red and green squares.

After checking all of you know the meanings of all the cards on the table, the prefects find a map and place it in the stand with a random side up. This map is for prefects only. Do not let the first-years see it.

* THE HAT

The color on the edges of the map shows which House goes first. Give that House the Sorting Hat.

* THE CENTRAL TILE

The team whose color is in the middle of the map will play second. To even that disadvantage, they start with one House tile on the board.

In our example, the Gryffindor prefect puts one red tile in the empty space in the middle of the cards.

* TILES

Keep the red tiles in front of the Gryffindor prefect. The Slytherin prefect gets the green ones. The locked door tiles and the Argus Filch tile are placed between them.

The tiles for the other 2 Houses are left in the box, as well as all components for special abilities and the House Cup Competition.

Before the prefects look at the map, make sure everyone knows the meaning of all cards on the table. If there is one nobody knows, maybe you can figure it out by peeking at the other side. Still nothing? Replace it with another card.

The Houses will take turns, beginning with the team that has the Sorting Hat. Their prefect will give **1 clue**, then their first-years will make **1 or more guesses**. Then, it is the other House's turn. Keep taking turns until one of the Houses has won the game.

*/: YOUR TURN :

* THE PREFECT GIVES A CLUE

If you are a prefect, your task is to give a clue for 1 or more cards belonging to your House (the more, the better).

Look at the cards belonging to your House and try to find at least two that go together. For example, **WHOMPING WILLOW** and **HERBOLOGY** might be connected by the clue *plants*.

Your clue must be 1 word and 1 number.

The word should tie your chosen cards together. The number says how many cards are included in your clue.

That's all you can say. Do not give any other hints.

* THE FIRST-YEARS SEARCH

Once the prefect has given the clue, it is time for the first-years to search Hogwarts for their cards.

They discuss the clue, and then the bravest of them – or the one most easily pressured into being brave – touches one uncovered card. That touched card is their House's guess.

The prefect checks the map to see what color that card is, and then covers the chosen card with a tile matching its color. If the card belongs to their House, the first-years can make another guess.

It is possible for the first-years to make more guesses on their turn, but the prefect gives only 1 clue. A guess is most often based on the current turn's clue, but it is a good tactic to also try for cards you may have missed on a previous turn.

The prefect never says if the guess is the card they actually meant. The first-years know only that they have found one more of their cards.

* MISHAPS

Three things can go wrong:

If you find **Argus Filch**, he finds you! You're headed straight to detention, the game ends, and **you lose**.

If you find a **locked door**, your turn ends.

If you find a card
belonging to the other
House, your turn ends.
You have accidentally
helped the other House
get closer to winning by
covering the card with
their House tile.

* ENDING YOUR TURN

If your turn does not end due to mishap, you can end it voluntarily. For example, if your prefect says *plants: 2* and you find 2 of your cards related to *plants*, you should end your turn, unless you still have a card to guess based on clues from earlier turns.

Once you end your turn, either by choice or by mishap, it is the other House's turn.

* THE "PLUS ONE" RULE

As long as they keep guessing their House's cards, the first-years are allowed to guess one more card than the number specified by the clue. So for *plants:* 2, they can guess up to 3 cards (assuming the first 2 belonged to their House).

You do not need this extra guess on your first turn, but later, you might have some cards that you missed on previous turns. You can use the "plus one" rule to catch up. An example is on pages 8–9.

*/: WINNING :

The first House to find all their cards wins. Well, more precisely, when a House has no more of their own cards left to find, they win. It's possible for the other House to accidentally find your last card, in which case you win on their turn.

If a House finds Argus Filch, the other House wins immediately. They don't have to look for any more cards.

EXAMPLE OF GAMEPLAY

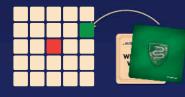

Slytherin starts. After considering the cards, the Slytherin prefect finds two Slytherin cards that might go together.

The Slytherin first-years discuss the clue, then make a guess.

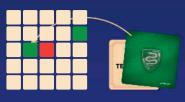

The map shows that card as belonging to Slytherin, so the prefect marks it as a Slytherin card.

Slytherin's next guess is not what the prefect expected, but it is also a Slytherin card ...

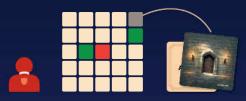

... so the prefect acts as though it was right.

Now it is **Gryffindor's turn**.

The Gryffindor first-years choose ARAGOG.

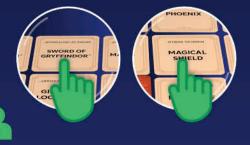

This card is a locked door, so Gryffindor's turn ends immediately.

Back to Slytherin.

Slytherin gives a clue for 2.

Note the Slytherin prefect decided to spell the word, to make it obvious their clue is not *night*.

And the first-years guess both. (Yes, that's right. In this example, SWORD OF GRYFFINDOR belongs to Slytherin. Well, not the actual sword, of course. The first-years are looking for information about the sword.)

The Gryffindor first-years have an idea for one more guess, but they have already guessed 4. The clue was for 3. Because of the "plus one" rule, Gryffindor must end their turn now. The Slytherin prefect will give the next clue.

*/ ADVANCED TECHNIQUES

Give clues that are about the meanings of the cards.

NOT about the letters. Don't say H: 2 for HEDWIG and HORCRUX. NOT about the map. Don't say **corners: 4** for cards in the corners.

When playing with words, you can't say a word on a card - or any form of a word on a card until the card is covered.

So you can't say Weasley: 2 for MRS. WEASLEY and PERCY WEASLEY.

If HOGWARTS CASTLE is in play, you can't say words like hoq, hogged, warty, sandcastle, or **groundhog** until the card is covered, even if the card is not one of yours.

However, when playing with pictures, it's okay to just say the thing you see in the picture.

"ONE THING" CLUES

In strict Codenames rules, your clue must be one word. The game works well this way, and we encourage you to try coming up with good clues using this restriction. For Codenames: Back to Hogwarts, you can agree to allow multiple-word clues as long as the clue means one thing in the Wizarding World.

Examples:

Tom Riddle is one person. Diagon Alley is one place. The Whomping Willow is one tree. Hogwarts, a History is one book. Defense against **the Dark Arts** is one class. However, this does not give prefects permission to simply add adjectives to normal words. Confusing riddle, dark alley, tall willow, and arcane arts should not be allowed.

If you want, you can expand this to include muggle names like **New** York City and King Arthur, but don't let prefects make up phrases like aquarium fairy stick.

If this rule leads to arguments about what is or is not "one thing", go back to allowing only one-word clues.

* ASK THE OTHER PREFECT

If you're not sure whether your clue is valid, ask the opposing prefect. (You have to whisper quietly enough that the first-years can't hear you.) Any clue the opposing prefect allows is a valid clue.

The "plus one" rule allows your first-years to make 1 more quess after they have successfully quessed the number of words specified by your clue. But sometimes you want them to make more guesses than that. Here are 2 special types of clues you can give:

* UNLIMITED CLUE

Suppose you have a clue for 2 cards, like *heart*: 2, but you want the first-years to guess a lot of cards from previous clues. You can say heart: unlimited instead. In this case, they do not know the clue points to 2 cards, but they are not limited to 3 guesses – they can guess 4 cards, 5 cards, or even more, as long as they keep guessing cards belonging to your House.

* ZERO CLUE

The clue **heart: 0** also allows unlimited guesses. (This is an exception to the "plus one" rule: we know that 0 + 1 = 1.)

In this case, the clue means "Don't guess the card related to heart." So if LOVE POTION is on the board, the first-years know not to quess it.

They should then ask, "Why not?" Well, if there are other potionrelated words on the board, like CAULDRON and SEVERUS SNAPE, maybe the prefect wants to say **potions**: 2. So guess those cards, while avoiding LOVE POTION.

A zero clue can also be used to avoid a group of words, which may be especially handy for Ravenclaw. And sometimes you need a zero clue to steer the first-years away from Argus Filch.

Even on a turn where a zero clue is used, the first-years must make at least 1 quess.

*** OOPS CLUE**

Once said, the clue cannot be taken back, even if it accidentally breaks a rule. (No. don't try to use a Memory Charm.) The other players usually just say, "Hey, you broke this rule. Be more careful next time." But if your group is extra competitive, or if they think your clue gave your side an unfair advantage, the official penalty for an invalid clue is: Your turn ends, and the opposing prefect gets to cover one of their cards.

*/: THE HOUSE CUP COMPETITION :

Now that you have played Codenames a few times, let's find out what happens when we add all four Houses to the game.

* SORTING CEREMONY

After players split into teams and pick their prefects, give the Sorting Hat to a random team. They will be going first. If you are playing multiple games with the same teams, give the Hat to the team that did not go first last time.

To determine what House each team will represent, the prefects draw a random map card. The team holding the Sorting Hat plays as the House indicated by the colors on the edges of the map card. The team without the Hat plays as the House matching the other color shown on the map. They will go second and start with a tile in the center (except for Hufflepuff). (But if everyone would be happier to have things be the other way around, feel free to pass the Sorting Hat to the other prefect.)

The team with the Hat plays as this House. They will **go first**.

The team without the Hat plays as the other House. They will go second and start with a tile in the center.

* HOUSE ABILITIES

Each House has two unique special abilities. They appear on double-sided House ability cards: one side is used for games where that House goes first, and the other side for when that House goes second.

Take the ability card matching your House and keep it in front of you, with the correct side up. (The rules on the other side will not apply to this game.) If the card shows any tokens on the left side, take them.

The rules of each ability are explained in detail in the Hogwarts House Compendium booklet.

If you want to try a specific matchup, like Ravenclaw versus Slytherin with Ravenclaw going first, the prefects can search through the deck for a matching map.

Please do not try to play a House not shown on your game's map. Please do not use your House's "going 2nd" ability when the map says you are going first. Your abilities must match your game's map, or things won't work correctly.

If you go back to playing without abilities (recommended when introducing new players to the game), always use Slytherin vs. Gryffindor map cards. The other two Houses have special map cards tied to their abilities, so only the redand-green maps are suitable for the introductory game.

The House Cup Competition is a year-long contest among the four Houses of Hogwarts. It won't take you an actual year to play it, but it does take place over several games.

Every time you play, you'll score points for the house that you represent. The results of each game can be tracked and stored in the hourglasses, reminding you which House is ahead the next time you open the box.

The cardboard hourglass included with the game lets you keep score in your very own House Cup Competition.

All four hourglasses start off empty. Whenever you finish a game, unlock the hourglass by removing the lock, and add one token of the victorious House's color to their hourglass.

Let's say Gryffindor won the first match. Put a red token in the hourglass, and say, "TEN POINTS FOR GRYFFINDOR!" in a bright, authoritative voice.

Whenever a House has more points than any other, they have taken the lead! Place the House banners on the hinges before closing the lock.

These banners will stay there until another House takes the lead. Keep the points and banners locked even when putting the game away.

Note:

If you want the House Cup to be fair, you should play with randomly drawn map cards, so every House has an equal chance to participate in the competition.

THE HOUSE CUP COMPETITION

* HEAD TO HEAD VARIANT

If you play Codenames a lot with the same two teams, you may choose to make the House Cup a long-term competition between those teams.

Each team picks a different House, which they will all represent for the duration of the school year. Start each game by drawing a **random map**:

If one team's chosen
House is on the map,
they get to be that
House. The other team
will be the other House.

If both teams have their chosen House on the map, even better – both teams will represent their Houses.

If the map has the

2 Houses that belong
to neither team,
discard it and draw until
you get a map that allows
at least 1 team to play
their chosen House.

As usual, give the Sorting Hat to the team indicated by the color on the edges of the map card, and enjoy playing the game.

When a team wins, add a token to the hourglass of the House they were playing as. Sometimes, they'll add a token to their chosen House. Other times, they'll add a token to a different House, but at least they stopped their main competitor from scoring. (Of course, the matches where each team plays their preferred House are the most important ones. But playing with only those maps would be less fun, since you'd just use the same abilities over and over.)

* THE END-OF-YEAR FEAST

When a House's hourglass is completely filled, the school year is over, and those students win the House Cup! You are free to keep the hourglasses filled for a while in celebration. Or, you can empty them and start another year at Hogwarts.

Wait, but which players won? If you played the head to head variant, you win if your House wins the House Cup. Otherwise, nobody wins. Or, rather, everyone does. This is a competition between Houses, not between players. The players just play games of Codenames, rejoicing in each victory. You may play the game with various players, switching teams and trying different Houses, and each game you play will affect the House Cup Competition in your box. If you won with the victorious House at least once, be proud of yourself – you contributed to that House's success!

* CREDITS

Game by: Vlaada Chvátil

*/. RULES REMINDERS * AND HELPFUL TIPS

- The prefects **must not give out any information** except for their clues. They must not talk about the map or about how good or bad their clues are.
- The prefects must **keep a straight face**. No grimaces, surprised squeaks, or heavy sighs while the first-years discuss their completely misguided ideas.
- Keeping a straight face is difficult. Courteous first-years **do not look at their prefects** to study their reactions. And even if they are given unintended information, they try to ignore it.
- It is allowed to give a clue for 1 card, but clues for multiple cards are more fun.
- The first-years do not have to guess based on the current turn's clue. They can start with a clue from an earlier turn. They can even guess randomly (but they probably shouldn't).
- The prefects can repeat the clues only when asked by their team, and they must say them exactly as they were given. They should not suggest whether their first-years are still missing some cards for a particular clue or not.
- The first-years can end their turn even if they are obviously missing cards from the current turn's clue. However, they are required to **quess at least 1 card**.
- As long as they keep guessing cards belonging to their House, the first-years can make multiple guesses. Their maximum number of guesses is the number in the prefect's clue plus one.
- The prefect should not inflate the number in the clue to give first-years more guesses. If the prefect wants the first-years to take more than one extra guess, the prefect should give an unlimited clue or a zero clue.
- Any clue the opposing prefect allows is a valid clue. Be fair. Don't ask to be allowed a clue that you would not allow the other team to use. And when asked to allow a clue, allow it if it is one that you would like to be able to use yourself.
- If you have played enough games with words and with pictures, you may combine them by laying out words and pictures in a checkerboard pattern.
